

"EXCELLENCE IN LEADING EDGE MANUFACTURING"

Want something better than OEM propellers?

- Turn to Turning Point for outstanding best in class performance at a great value.
- Custom prototyping of new designs to meet your full range of needs.

Looking for a reliable supplier?

- Our new stainless steel factory starting in January 2022 has excess capacity to meet your needs.
- Our aluminum factory has ramped up capacity to meet the enormous market demand.

Interested in innovative new designs?

- Try our existing line of top performing aluminum and stainless steel propellers, ask for a demo today.
- New and available now, our MasterTorq™ Sound Dampening Hub™ [SDH™] system provides a cost effective solution to Yamaha®'s SDS® system and works on Mercury® applications too.
- New MasterTorq™ Fat Shaft Hub™ [FSH™] for Mercury's 1.25" propeller shaft offers a competitive solution to the Mercury® design (Available Q1 2022).
- Currently in development is an aluminum pontoon boat 3 blade propeller that is designed to outperform the competition on 4-1/4" gearcase applications.
- Currently in development is a high-performance Bass, Bay and multi species boats 3 blade propeller that is designed to outperform the competition on 4-3/4" gearcase applications.

6-300+hp · 3 AND 4 BLADE · ALUMINUM AND STAINLESS STEEL · OUTBOARD AND STERNDRIVE BOAT PROPELLERS

Engineered to Work On: Coleman® Evinrude® Honda® Johnson® Mariner® Mercury® MerCruiser® Nissan® OMC® Parsun® Suzuki® Tohatsu® Volvo Penta® Yamaha®

WHY TURNING POINT PROPELLERS?

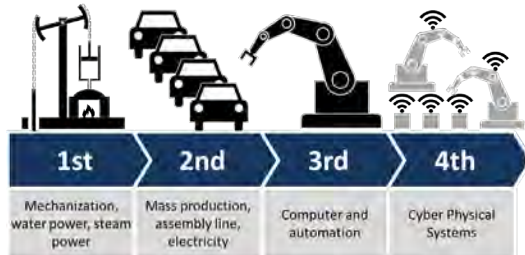

- Best in class aluminum and stainless steel performance propeller designs.
- Top performing stainless steel propeller designs.
- Aluminum propellers that perform like stainless steel designs.
- Industry leading 4 blade Dual Geometry and Swept Cleaver designs with 3 blade top end speed.
- Rugged interchangeable MasterGuard Hub System that maximizes protection of the lower unit with industries only Lifetime warranty.
- World-class technical support – we'll assist with maximizing boat performance through propeller recommendations, test prop support and on the water testing.
- High production capacity including a new state of the art 223,000 SF stainless steel factory.
- US Corporation located in Jacksonville FL who owns and operates our own manufacturing plants in the tariff friendly countries of Taiwan (Stainless) and Malaysia (Aluminum) with complete control over quality and the supply chain
- Network of Independent sales reps to assist in your local market.

STAINLESS STEEL PLANT OPENED FALL 2020

INDUSTRY 4.0 MANUFACTURING

- State-of-the-art highly automated facility. “Compliments our existing high capacity advanced aluminum manufacturing facility”
- Robotic casting.
- Increased Capacity.

MasterTorq™ (800 SERIES)

SOUND DAMPENING HUB™ - SDH™

An engine design issue inherent in some 4 stroke outboards is creating an undesirable noise at idle caused by shift dog clutch engagement in the gearcase.

- Turning Point's new Sound Dampening Hub – SDH with absorbent material masks the noise resulting in a quieter more enjoyable experience for the boater.
- Noise is most commonly occurring with Yamaha and some Mercury on 4-1/4" (40-150HP) and 4-3/4" (150 to 300+HP) gearcase applications.
- Intended for use primarily with stainless steel propellers but works with aluminum props too (Shift Dog noise is not very common on applications using aluminum props).
- Available for Yamaha® and Mercury® outboards on 4-1/4" (40-150HP) and 4-3/4" (150 to 300+HP) gearcase applications.
- Similar design and fit characteristics as our 700 Series Hub Kits but with an added dampening material.
- A less complicated more cost-effective solution than Yamaha's Shift Dampener System (SDS™)
- 1 year material and workmanship warranty
- Available Fall 2021

Understanding a noise issue created by engine design

Noise is created when the shift dog clutch engages due to slack in the assembly. Because 4 stroke engines fire their cylinders at different intervals, the shift dog assembly is constantly loading and unloading at idle further amplifying the noise thereby creating a constant knocking noise. This is especially noticeable when a stainless steel propeller is used, the added weight of the prop takes more energy to turn, resulting in an even louder shift dog engagement.

MasterTorq™ (600 SERIES)

FAT SHAFT HUB™ - FSH™ for Mercury® Applications

Engineered for Applications using a 1.25" Prop Shaft

For the first time Dealer's rigging Mercury's Verado® and ProXS® engines with larger prop shafts now have access to Turning Point Propellers' sought after high performance Express® stainless steel line of propellers (Hustler aluminum propeller housing are also compatible).

- New extreme duty design and fit with replaceable cushion material inserts.
- A more cost-effective solution than OEM hub options currently in the market.
- 1 year material and workmanship warranty
- Available Winter 2021-2022
